

3rd ISTA Summer School

in Analysis and Mathematical Physics

Lecturers:

Maria Colombo (EPFL, Lausanne):

Nonuniqueness and anomalous dissipation in the Navier-Stokes equations

Mathieu Lewin (Université Paris Dauphine - PSL):

Mathematical foundations of Density Functional Theory

Jan Philip Solovej (University of Copenhagen):

The universal structure of large atoms and molecules

Organizers: László Erdős, Julian Fischer, Jan Maas, Robert Seiringer

For further details and registration please visit
<https://summerschool-analysis.ista.ac.at/>

Registration deadline: May 15, 2024

Limited financial support available for travel/accommodation!

Application deadline for financial support: March 31, 2024

June 10-14,
2024

ISTA, Am Campus 1, 3400 Klosterneuburg, Austria

European Research Council
Established by the European Commission
